

CLIPS

TRUSS SUPPORT

Truss Supports strengthen and guide trusses, giving support and ensuring better fruit quality and increased production.

Support the cluster, The top goes over the twine, while the fish-hook end is pulled behind the first tomatoes in the truss

J-HOOKS

GRAFTING CLIPS

Used for grafting tomatoes, peppers, cucumbers, eggplant for different size stems.

CLIPS

Connect plants to twine quickly and easily, saves time and labor, aired clip promotes better ventilation and helps prevent Botrytis fungus.

BUTTERFLY CLIP

A clip for attaching the plantstem to a bamboostick in a fast and efficient way. The shape of the bambooclip is compact which makes it almost invisible on your product.

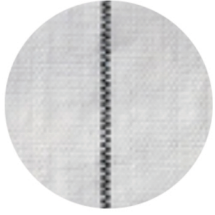

CONVENTIONAL PLUG

They are the ideal basis for automated processing, uniform germination and a high success rate. The shape and firmness of the plugs are of a quality that makes processing significantly easier. Distribution of water, nutrients and pH-value is also uniform, which has a beneficial effect on germination results. Guarantees fast root growth.

ORGANIC PLUG

Very high quality Canadian peat, 20% perlite, vermiculite, a mild NPK starter charge (including micro nutrients) it's perforated for easy root penetration. Uniform germination with high success rate. Guarantees fast root growth.

GROUND COVER

UV stabilized, polypropylene fabric. It is a strong heavy fabric, which allows it to be more resistant to tearing, puncturing and weed penetration. Use inside the greenhouse as it reflects the light to the underside of the leaves, creating more light and allowing fuller growth.

GROUND COVER

Ideal for greenhouses, outdoor displays and as a weed barrier for plantings without topical coverings where a weed free environment is a must. UV stabilized to last even in direct sunlight. Reduces the need for herbicide.

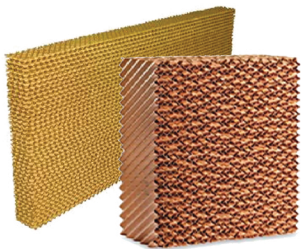

BAMBOO STAKES

The stakes can be used for supporting a variety of vegetable and ornamental plants including cucumbers, tomatoes, peppers, and orchids. Lasts much longer than wood.

TWINE

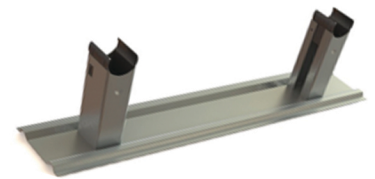

White polypropylene used with free fall hooks and provide strong support for greenhouse crops.

COOLING PADS

Made of the highest quality for strength and efficiency, constructed with high absorption cellulose and treated with wetting additives and anti-rot agents.

PIPE RAIL SUPPORT

POTS

Different pot sizes for blueberry, raspberry, and blackberry crops.

ROLLER HOOK

Is a state of the art trellising hooks. The unique design of the rollerhook enables the worker to easily, rapidly and safely lower and lean tomato or cucumber plants, avoiding slipping or jumping from the wire.

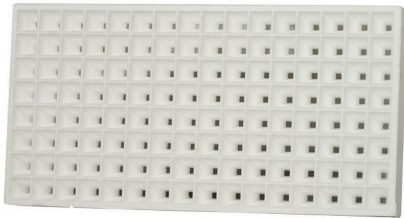

ELASTIC BAND

Hold young plants to prevent breakage, (Elastic Band does not contaminate roots/plants)

FOAM TRAY

ELASTIC CORD

PLASTIC TRAY

WHITE FLY TRAP

Trapping pests on places with a great pest pressure or places where a high pest pressure is expected in ornamental crops you can use the roller traps basically year round, but with vegetable crops the best time is after the first planting or just before planting. Prevent White fly, leaf-miner, aphid, trips and fungus gnats.

IRRIGATION DRIPPER

The most efficient method of irrigation, drip irrigation uses up to 70% less water compared to flood irrigation and can more than double your crop yield. Design your own customized setup with our new Drip Irrigation System. Save water, increase fertilizer efficiency and grow healthier crops with our Drip Irrigation System!

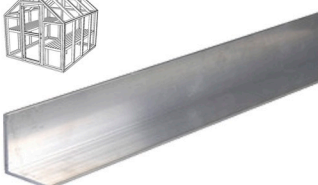

FAN

Ventilation is perhaps the most important component in a successful greenhouse. Without proper ventilation, greenhouses and their plants become prone to a myriad of problems. Good ventilation prevents pest infestations and will encourage important pollination within the greenhouse. If you find your plants struggling in any of these areas, selecting the proper fans and vents for your greenhouse can help to alleviate the problem.

SPRAYERS

Sprayers are easy to use, easy to fill, and feature intuitive controls for precise application. Our sprayers provide excellent spraying coverage and our gasoline-powered backpack sprayer/duster can go from misting to dusting – and can also be used as a powerful leaf blower for easy cleanup. If you're looking for strong performance in a portable package.
